

Immediately Revive Your Natural Radiance in Under an Hour with Absolutely No Downtime

CO2Lift Pro Carboxy Gel is a genius use of a mask. The gel delivers carbon dioxide into the area, forming a cooling mask covering on the skin.

This carboxy gel addresses a variety of skin concerns quickly, safely and effectively. It is suitable for all skin types.

No Pain. No Downtime. Just Results.

CO2Lift applied immediately post microneedling.
Results after 45 minutes.

Your CO2Lift Pro Treatments

Stand-Alone Treatment

Perform one treatment every 5-7 days, then one per month for maintenance.

Series Treatments

Each CO2Lift Pro treatment builds on itself and achieves new levels of hydration, revealing remarkable anti-aging results. We recommend a series of 3 to begin.

Post Procedure Care

CO2Lift Pro Carboxy Gel is ideal for post care after lasers, chemical peels, microneedling and other types of invasive procedures to accelerate healing and enhance results. Consider it your "extended warranty" after a procedure!

The Fastest Way
to Better Skin.

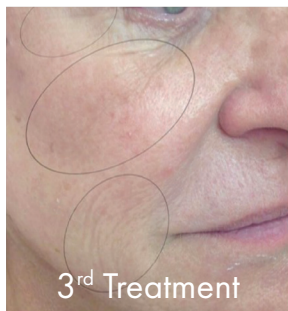

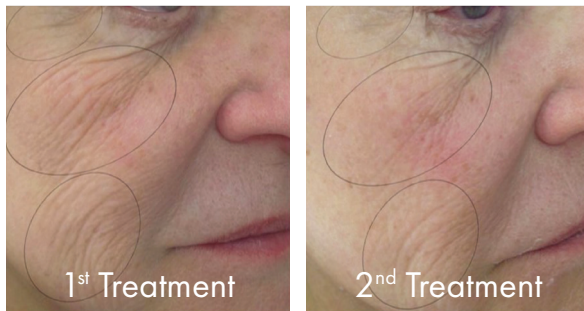

The Only Scientifically Proven Carboxytherapy Gel Treatment

Carboxytherapy is the use of carbon dioxide (CO₂) to regenerate the skin. By infusing carbon dioxide into the skin, the body will respond by rushing oxygen rich blood to the tissue.

CO₂Lift Pro Carboxy Gel is a super hydrating treatment that delivers carbon dioxide through a patented gel. This mixture is kept on the skin for 35 minutes to an hour. It has a compounding effect every time it's used within 7 days of application.

This treatment can be done in your provider's office or in your own home. Ask your provider to see if CO₂Lift Pro is right for you!

CO₂Lift Pro Results

Improves the skin's elasticity without the need for an invasive procedure. The innovative gel treatment is gentle enough to apply even on your eyelids and under eye.

After just one use, CO₂Lift Pro:

- ✓ Increases skin's hydration by 117%
- ✓ Lifts and tightens skin
- ✓ Reduces wrinkles, lines and pore size
- ✓ Smooths skin texture
- ✓ Brightens skin tone
- ✓ Reduces redness and swelling

How it Works

- Carbon dioxide is created when the water in one packet mixes with the Gluconolactone in the second packet to form a mild acid. It then mixes with the Magnesium Carbonate to create CO₂.
- The gel is applied to the desired area and forms a mask that holds the CO₂ into the skin.
- Once applied, the gel sits for 35 minutes to an hour so that the CO₂ is absorbed. Peel off to reveal radiant, younger looking skin.

How is CO₂Lift Pro Carboxy Gel Different From Other Gels?

CO₂Lift Pro Carboxy Gel can be used for the face, neck, hands and body, with a different formulation to treat the vulva and vagina.

“This is the best mask I have ever used! My skin was glowing for 6 days. I'm getting married in 6 months and will be using this mask leading up to it to give me a wedding day glow.”

– Brittany F: CO₂Lift Pro User

54 Year Old With Rosacea

The patient was extremely happy after the first treatment and extremely impressed after the second.
